**Carriers**

### **Dyna**

Dyna has been a professional Dutch manufacturer and exporter of DynaForm seating elements since the 1990's. We develop, manufacture and market our unique seating elements -which are based on **the hammock principle**- as well as a variety of DynaParts which also can be used on all kind of wheelchair brands.

### **DynaForm**

By using high quality materials with specific properties, Dyna managed to develop a seating element that directly transforms and adapts to the contours of the user when seated on. Dyna has developed **technically sophisticated** products that are recommended by many professionals today. Intended for users who need more support than the conventional seats and backrests can offer. The user will also enjoy the comfort which DynaForm offers.

*...biomechanical  
recline...*

...fully dynamic sit...

### DynaFormEzy

The DynaFormEzy is the entry model of the DynaForm line-up. This seating element forms itself to the seating and sitting position of the user. Intended for users who need more support than the conventional seats and backrests can offer, without extras.

### DynaFormFlex

The DynaFormFlex is the most versatile model in the DynaForm series. The biomechanical back angle setting makes this seating element useable for a very broad audience. In developing this unique seating element great attention has been given to optimal user support.

Also, the DynaFormFlex is suitable for users with a (strong) kyphosis and /or reduced mobility in the pelvis.

### DynaFormMax

The DynaFormMax is designed for users who are passive and users with involuntary movements. The **biomechanical recline** and additional lateral support leaves the user to sit extremely stable and comfortable.

Especially for the target group of the DynaFormMax the lateral support is increased additionally and the front of the seat has an additional raised contour.

\*DynaForm: available in 9 sizes, with comprehensive parts and mountable on various carriers.

### Dyna Custom Made

Dyna has the expertise and facilities to realize individual solutions for our users where standard solutions are no longer functionally adequate. Here we distinguish between standard adjustments and individual adjustments. The default adjustments are included in the price list. Individual customization is available through consultation with our product specialist.

DynaFormEzy

A black, quilted office chair with a high backrest and a seat with vertical ribbing. It is shown from a three-quarter perspective.

DynaFormFlex

A black office chair with a high backrest and a seat with vertical ribbing. It is shown from a side profile, reclined. A dashed white arrow indicates the reclining motion.

DynaFormMax

A black office chair with a high backrest and a seat with vertical ribbing. It is shown from a side profile, reclined. The backrest is tilted further back than the DynaFormFlex model.

008090

### Leg support

#### 008060

Leg support filled with polystyrene beads and fibres, to be mounted on standard or comfort leg rests. Maximum leg support width about 58 cm. (measured outside leg supports). Versatile.

#### 008090

Leg support Max calf rest, supplied with base plate covered with rubber. Calf rest with increased side bolsters. Applicable to 1-piece leg rest Ibis.

008130

008140

#### 008130

Adaptation set for shortening leg rest Ibis (minus 10 cm).

#### 008140

Adaptation set for heightening leg rest Revab (minus 10 cm).

008150

008010

#### 008150

Adaptation set for heightening one piece leg rest Revab (minus 5 cm).

### Footplate

#### 008010

Enlarged, covered with rubber with cut-outs for wheels. Size 460x300 mm.

#### 008020

Padded.

008020

008030

#### 008030

Padded foam wedge for short lower leg length (approx. <43 cm.) fitted with recess for castors, to fasten with Velcro. Size 460 x 300 x 100 mm. Versatile.

#### 008070

Bead cushion for footplate. Versatile.

008070

008040

### Calfplate

#### 008040

Padded. Size 400 x 200 mm. Versatile.

#### 008050

Padded calf plate with flanges.

## 008080

Bead cushion for calfplate. Versatile.

## Armrest

### 009010

Padded, extended inwards (110 x 460 mm). Recess follows the shape of the Dyna seating elements. Versatile.

### 009020

Padded, extended with storage compartment (100 x 350 mm.). Pocket depth 55 mm. Versatile.

### 009030

Flex armrest, filled with polystyrene beads and fibres. Versatile.

## Headrest

### 010010 (m) / 010020 (l)

Padded, bendable. Height 110 mm. Comes complete with steel plate for mounting. Available in sizes M (average width 350 mm.) and L (average width 400 mm.). Versatile.

### 010030

Max headrest. Padded. (480 x 280 mm.). Equipped with redundant ironwork. Versatile.

### 010040

The 3D headrest bracket makes it possible to adjust the headrest asymmetrically in relation to the centreline of the seating element. Simple and quick adjustment by 1-button operation. Without headrest.

## Lateral support D-shaped

### 011050 (l) / 011060 (r)

Height adjustable. The DynaFormEzy, DynaFormFlex and DynaFormMax comes standard with mounting points. Dimensions 180 x 160 mm. Available in left and right.

## Biomechanical back continuously adjustable

### 002010

Through a unique back angle system the back angle can be continuously adjusted while maintaining the biomechanical properties. This keeps the body and the seat support relative to each other at the same position. The body is not sacred to a sitting position and the position of the pelvis is maintained. Applicable on DynaFormFlex and DynaFormMax.

011030

011040

## Positioning belt

### 011030

Positioning belt double adjustable inside. Versatile.

### 011040

Positioning belt double inside adjustable spigot (BOPZ buckle). Versatile.

012010

012040

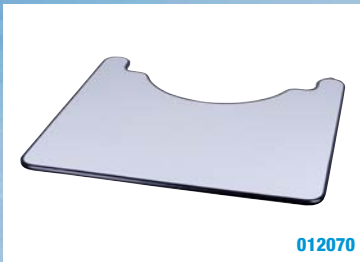

## Worktop

### 012010 (s) / 012020 (m) / 012030 (l)

Polycarbonate, including plug and receiving tube. Recess follows the shape of the Dyna seating elements. Available in sizes S, M and L. Versatile.

### 012040 (s) / 012050 (m) / 012060 (l)

Polycarbonate with belly padding, including plug and receiving tube. Recess follows the shape of the Dyna seating elements. Available in sizes S, M and L. Versatile.

012070

021100

### 012070(s) / 012080(m) / 012090(l)

Wood covered with Formica, including plug and receiving tube. Recess follows the shape of the Dyna seating elements. Available in sizes S, M and L. Versatile.

### 012100 (s) / 012110 (m) / 012120 (l)

Wood covered with Formica with belly padding, including plug and receiving tube. Recess follows the shape of the Dyna seating elements. Available in sizes S, M and L. Versatile.

012130

004020

### 012130 (s) / 012140 (m) / 012150 (l)

Wood, fully padded and includes plug and receiving tube. Recess follows the shape of the Dyna seating elements. Available in sizes S, M and L. Versatile.

## Cover

### 004020 t/m 004100

Terry cover, applicable to DynaFormEzy and DynaFormFlex.

### 006010 t/m 006090

Terry cover, applicable to DynaFormMax.

### 005010 t/m 005090

Terry cover with incontinence-inlay, applicable to DynaFormEzy and DynaFormFlex.

### 007010 t/m 007090

Terry cover with incontinence-inlay, applicable to DynaFormMax.

009040 Terry cover for flex armrests.

005010

009040

## Dyna Stratos and Space

Dyna manufactures and supplies also the Stratos and Space solid adjustable multipurpose chairs that provides support and comfort and are suitable for a variety of applications. Made from powdered coated steel frames with high quality low maintenance covers are these products perfect useable in the healthcare, aged care as well as mobility market.

### DynaStratos

The NEW DynaStratos is designed as a solid versatile basic model and offers good support and comfort. It is built entirely to the wishes and demands of the modern healthcare professional and in that way perfectly usable in all levels of healthcare.

### DynaSpace

The DynaSpace is designed for the group of people who are still mobile, but while sitting needs more support and comfort than the average furnishing can offer. A gas spring gives the DynaSpace an infinitely variable seat angle of 17° backwards so that more support and comfort is offered. Because of the 6° adjustment forward it's easier to stand up. It is possible to mount the DynaForm seating elements on the DynaSpace frame.

The DynaSpace is also built entirely to the wishes and demands of the modern healthcare professional. With AD-Seating, divisible back support, leg reception to IV pole holders etc. This makes DynaSpace excellent for treatment and nursing departments with high demands on comfort, flexibility, hygiene and convenience.
